

SMART Recorder

SMART Recorder Features

Using SMART Recorder, you can record the actions you take on the interactive screen.

If you connect a microphone to your computer, you can record your narration.

After you create a recording, you can play the recording using QuickTime.

SMART Recorder

SMART Recorder in toolbar

1. Check to see if the SMART Recorder is in the Notebook toolbar. 
2. Click on View > Customize Toolbar.
3. Drag the SMART Recorder icon up into the Notebook toolbar. Click Done.
4. You can also open the SMART Recorder using the SMART Board Tools. Click Open > Recorder.

SMART Recorder

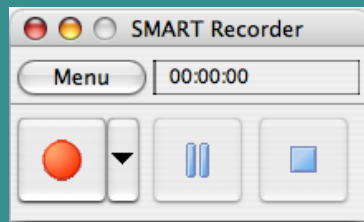

Using the SMART Recorder

1. Click once on the SMART Recorder icon.

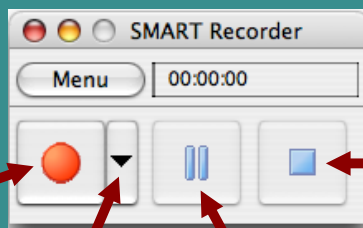

2. You will get a window that looks like this:

SMART Recorder

SMART Recorder Buttons

Record button

Pause button

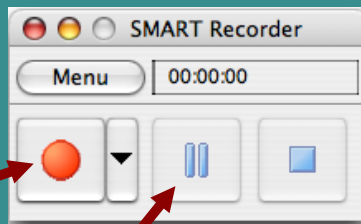

Stop button

Clicking this triangle gives you options for the recording area. *Record Desktop* is the default. When you click *Record Area*, you can choose how large the recording area is. Note: once you've drawn a rectangle around the recording area, the recorder turns on automatically.

SMART Recorder

Recorder Tips

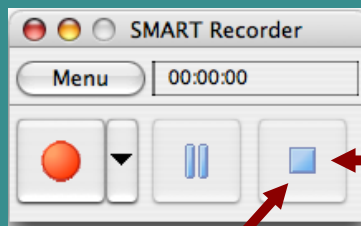

Record button

You can pause the recorder by clicking the Pause button. This is helpful if you want to change what's in the recording area - you can move what's in the recording area and when you're ready to record again, press the record button.

SMART Recorder

Saving your Movie

Note: If you don't want to save your movie, click the Stop button, then Cancel, then Yes to delete it.

When you are finished making your movie, click the Stop button. Give your movie a name and note where your movie is being saved. Your movie will be saved as a Quicktime movie.

SMART Recorder

Your turn!

Try using the recorder to make an instructional movie for your students. When you're finished, save it (remember to give it a name). Also, note where you are saving the movie. Try making a link to your movie in a Notebook lesson.
